contact@njudd.com  
/in/nickjudd  
njudd

## Competencies

## Coding

R • Lavaan • lme4 • zsh  
SQL • Python • Docker • Git  
L<sup>A</sup>T<sub>E</sub>X • Julia

## Experience

Cognitive training, differential psychology, neuroimaging, causal processes.

Sep 2021-ongoing

### Research Scientist

Donders Institute for Brain, Cognition and Behaviour

My current project is with Dr. Rogier Kievit—named life sciences 'Rising Star' by Nature Magazine—he is a professor in developmental neuroscience at the University of Cambridge and the Donders Institute. We are looking at how to properly localize the effects of cognition in the brain. We have started a collaboration with Dr. Stuart Ritchie in King's College London and the resulting project will have a conceptual section, simulation-based findings, along with empirical cognitive and genetic data.

Sep 2016-ongoing

### Research Scientist

Karolinska Institute

Spanning eight years this has been my longest scientific position and I have worked on a variety of projects related to cognitive training, development, and/or neuroimaging. This involves the conceptualization, design, and analysis of data. My two largest and most impactful studies are highlighted in the section 'Selected Projects'.

In this role, I directly supervised master's students in machine learning, medicine, and cognitive neuroscience. Furthermore, I have been fortunate enough to be invited to international conferences around the world to give talks about my research.

Feb 2016-Aug 2016

### Research Scientist

University of Amsterdam

Collected data and wrote a thesis on high field MR imaging techniques to atlas the human subcortex in the lab of Dr. Birte Forstmann.

Feb 2015-June 2015

### Researcher

Umeå Center for Functional Brain Imaging

Collected data and wrote a thesis on unconscious working memory in the lab of Dr. Johan Eriksson.

May 2012-Sep 2014

### Research Assistant

University California San Diego

I worked with Dr. Jeffrey Max in Rady children's hospital during my B.A. degree in the summers. This project was looking at the impact of mild traumatic brain injury on cognition, the brain, and psychiatric outcomes in 300 children. Over the years I became more embedded with the project, collecting data, filling out ethics applications, and becoming a certified MRI scan operator. This year we published the findings. Dr. Jeffrey Max took me under his wing and is truly a scientific mentor of mine – to this day we still meet up and discuss science.

## Selected Projects

Jan 2018-Jan 2021

### App based cognitive training

Cognition Matters

- Worked on the cognitive training app Vektor to implement different spatial training exercises for the goal of improving mathematics in 17,000 children.
- Published in a leading Nature journal.
- Was invited for a talk at UCL's Centre for Educational Neuroscience.
- Learned SQL, clustering techniques and mixed effects models.

Jan 2019-Mar 2020

### IMAGEN Project

Karolinska Institute

- Led a team of researchers involved the analyses of imaging, genetic and behavioural data.
- Published in a leading journal (PNAS).
- Learned advanced statistical methods (e.g., structural equation modeling, confirmatory factor analysis, cluster permutation).
- Directly supervised two masters students.

## Education

Feb 2018- Jun 2022	<b>Ph.D. Neuroscience</b> Opponent: Dr. Gaia Scerif Department Experimental Psychology, Oxford University	Karolinska Institute
2015-2017	<b>M.Sc. Brain and Cognitive Sciences</b>	University of Amsterdam
2014-2015	<b>M.Sc. Cognitive Science</b>	Umeå University
2011-2014	<b>B.A. (Hons) Psychology</b>	DBS School of Arts
2008-2011	<b>Irish Leaving Certificate</b>	St. Kilian's German School & La Jolla High School

## Professional training

May 2021	<b>Medical Innovation Bootcamp</b> Carlson School of Management & SESS
May 2021	<b>Singularity Workshop</b> Uppsala Multidisciplinary Center for Advanced Comp. Sci.
Apr 2021	<b>Analyzing data in a HPC environment using R</b> KTH royal institute of technology
Feb 2019	<b>Structural Equation Modeling Workshop</b> Lund University
Jan 2019	<b>High performance computing introductory Workshop</b> Uppsala Multidisciplinary Center for Advanced Comp. Sci.
Jun 2018	<b>HCP Exploring the Human Connectome Workshop</b> University of Oxford
Apr 2016	<b>Nuclear Magnetic Resonance Workshop</b> Spinoza Center for Neuroimaging
